112mm SnapIt
Extruded
Aluminium Half
Round Gutter

76mm Swaged
Extruded
Aluminium
Downpipes

FINISH:

Supplied powder
coated to order in
RAL 7015 Slate Grey

JOB SPECIFIC DETAILS & SCOPE OF WORKS

The building company installing the aluminium rainwater system on this refurbishment project knew that their client was very particular and wanted a sharp look to finish the transformation of a tired bungalow into this spacious, contemporary family home.

From previous use they recognised SnapIt to be both a high quality product, despite its affordable price, and simple to use. Samples supplied by Rainclear were shown to the architects and client, easily convincing them, along with the ability to order a bespoke RAL colour within 10-15 days, to select SnapIt as the perfect product and Rainclear as the supplier.

The nature of rainwater products means they often require longtail deliveries and these installers had found Rainclear made this easy by coordinating deliveries in tune with the build, even in difficult locations, which took the pressure off allowing them to get on and do what they do best - get on with the build.

Nicholas Bolt told us. *"We care about attention to detail and so do Rainclear, which is why we keep using them". "They even provide pots of top-up paint for projects in special RAL colours, which is just brilliant". "You may have heard of the big manufacturers but many still haven't heard about Rainclear. I'm glad I did"*

ALUMINIUM RAINWATER SYSTEM

Aluminium represents a versatile and lightweight option when compared to other metals and due to the various manufacturing methods can be installed on all types of project. The powder coated option is extremely durable with an expected life span of 25 years plus.

AN IDEAL SYSTEM FOR EVERY BUILD

Aluminium options:

- **Cast aluminium:** a traditional cast product producing gutters in 1.83m lengths with cast eared downpipes to complete the heritage look.
- **Extruded aluminium:** an extruded gutter in 3m lengths with swaged or flushjoint downpipes to compliment contemporary projects.
- **Pressed aluminium:** box or rectangular pressed gutters with swaged or flushjoint downpipes for contemporary & commercial projects.

- The standard ranges comprise of half round, victorian ogee, moulded & deep flow profiles in various sizes. Downpipes are available with cast eared or non eared sockets, flushjoints or swaged connections in round, square and rectangular profiles.
- Aluminium can be supplied in a mill finish where the product will not decay but oxidise, leaving a white powder residue. The product can also be supplied in a comprehensive range of RAL or BS colours with 26no being available as standard colours.
- Special ranges can be fabricated or cast to order with true radius bespoke gutters supplied and manufactured upon request and to the customer's specific design.

Rainclear, the UK's leading stockist of metal rainwater systems - effective, long lasting gutters & downpipes
