

THE HOME OF METAL GUTTERING

The UK's number one stockist of metal rainwater and drainage products for new build or conservation, renovation and refurbishment.

CASE STUDY

Galvanised Steel

Black 5x4" Moulded Cast Aluminium

PROJECT NAME:

Textured Black
5x4" Moulded
Cast Aluminium

LOCATION:

Powys,
Mid Wales

MATERIAL & PROFILE:

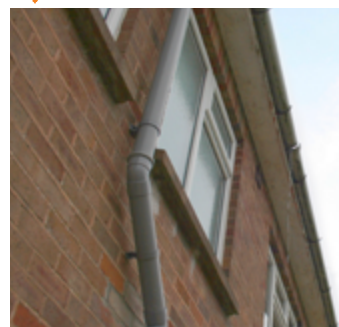

Textured Black
5x4" Moulded
Cast Aluminium Gutters
with 63mm Round
Downpipes

FINISH:

Heritage Textured Black
- BBA approved, factory
applied, Polyester
Powder Coated (PPC)

After installation ↑

JOB SPECIFIC DETAILS & SCOPE OF WORKS

This 3 bed detached home in Powys was in dire need of replacement gutters. The plastic ones were faded, cracked and just not up to the job.

The 5x4" Moulded Cast Aluminium guttering is a deeper profile with greater capacity for the rainfall, sometimes intense, often experienced in this Mid Wales location.

"You wouldn't imagine replacing the guttering would make such a difference to the look of our home. There's the obvious improvement in the instant 'kerb appeal', but also, now that the interior walls upstairs will stay dry, the bedrooms can finally be decorated, the paths around the house are kept dry - safer for the kids to run on and the grandparents to walk on - and we're preventing any long-term damage to the foundations of the house too" Mrs. A. Jones

The factory applied Polyester Powder Coating (PPC) has a life expectancy of at least 15 years in heavily polluted areas and 20 elsewhere, and extends the life of the product beyond 40.

- Long life – 40+ years
- Low maintenance
- 100% recyclable
- Lightweight & easy to fit, yet durable
- Textured Black available with Next Day Delivery - Other colours available with longer lead times

The Moulded Cast Aluminium profile is a low maintenance alternative to renewing Cast Iron Moulded Ogee guttering while maintaining a like-for-like appearance or where a traditional character is desired.
