CASE STUDY

Anthracite Grey Aluminum Door Canopy, Fascia, Soffit, Window Surrounds, and Galv Steel Guttering Refurb

PROJECT NAME:

Anthracite Grey Aluminum Door Canopy, Fascia, Soffit, Window Surrounds, and Galvanised Steel Guttering Refurb

LOCATION:

East Finchley, London

MATERIAL & PROFILE:

Bauhaus Style Aluminium Door Canopy, Aluminium Fascia & Soffit, Aluminum Window Surrounds, and colour coated Galvanised Steel Guttering and Downpipes

FINISH:

RAL 7016 Anthracite Grey

Rainclear offered support over the phone on this project as the customer knew he didn't want plastic but knew he wanted anthracite grey and a modern look. Beyond that was open to investigate all metal options.

We began by ordering the door canopy which would be bespoke.

An anthracite grey aluminium 2m BS canopy with integral LED light and a bespoke anthracite grey letterbox

Next was the fascia and soffit and the window surround. He had never worked with metal fascia and soffit before.

Then finally, colour coated galvanised steel gutter and downpipes (chosen over aluminium because of the budget - which wasn't limitless and had already been stretched on the bespoke canopy and unique window surround.)

The customer told us :

"(The) colour match is fantastic to the other anthracite products - it works well"

"GREAT product, it's really lovely - it's getting a LOT of attention from my neighbours - you're on to a winner here."

and finally "Shop with confidence"
